## About This Game

In Startup Freak you take the role of a budding entrepreneur, and grow your very own software startup from humble beginnings to a multi-million dollar company. Along the way you will have to overcome countless challenges, from building, testing and securing your product, to devising the ideal marketing strategy and securing investment. Through it, you must ask yourself the ultimate question: are you a Startup Freak?

## Build a stellar team

Your staff are everything especially in those all-important early years. Hire an awesome team, skilled in technical, design, operational, or sales aspects of your startup.

## Build out your product

---

Create your very own product by researching the market and building bigger and better features that match your users' demands. But building features isn't everything! You must ensure they are tested and bug-free, well secured, and tuned for performance. Features can also be upgraded and enhanced, for example by incorporating responsive design, or adding accessibility.

## Plan your infrastructure

Even the best software is worthless without the right hardware to run on. Manage your data centres across the world, by researching better and more powerful servers, and dealing with ever increasing and shifting user traffic to your services.

## Find the right sales channels

Not every sales channel is created equal. More importantly, not every sales channel works well for all types of product. It's your job to use data, and a bit of intuition, to figure out the best go-to-market strategy and win against the odds.

## Tune your pricing

Pricing software is more art than science. Plan a pricing strategy, test it, and adapt to the market.

## On-board investors

Early stage startups are always in dire need of funding. But pitching your venture to a potential investor is no easy feat! Research and understand your would-be investors, put together a convincing slide-deck, and watch them offer you millions for a small share in your company. P.S. don't forget to haggle!

## Deck out your office

What startup doesn't want to be the talk of town for its fancy office? Buy all sorts of gadgets and furniture for your office and give your employees yet another reason to stick around.

## Make a big exit

Sooner or later, every founder wants to make an exit from their startup and see the fruits of their labours on a check. The number on that check is dependent on every single decision you have made along the way.

Title: Startup Freak  
Genre: Indie, Simulation, Strategy, Early Access  
Developer:  
PulPul Games  
Publisher:  
PulPul Games  
Release Date: 12 Apr, 2018

b4d347fde0

**Minimum:**

**OS:** Windows 7

**Processor:** 2 GHz Dual Core

**Memory:** 2 GB RAM

**Graphics:** Hardware Accelerated Graphics

**Storage:** 1 GB available space

English

The dashboard is divided into several sections:

- Backlog:** A sidebar on the left with tabs for 'Feature', 'Test', 'Performance', and 'Security'. It contains a list of items with icons and numbers, including a blue circle, an orange person icon with '4', and several green icons with numbers 0, 3, 0, 0, 0, 4, 3, 2, 3.
- Product Metrics:** A central grid of red and green squares. A green circle highlights a specific area in the upper-middle part of the grid. Below the grid, it shows 'Tech Effort: 20' and 'Design Effort: 0'. Buttons for 'Add to Sprint' and 'Discard' are present.
- Next Sprint:** A panel on the right with a close button. It features a row of four icons: a green phone with '3', a purple person with '7', a blue network with '9', and a red bug with '1'. Below are several greyed-out icons, including a gear, a lock, and another lock.
- Team Capacity Per Sprint:** A table showing capacity for different roles:

Team Capacity Per Sprint	
Dev:	20
Sales:	3
Design:	14
Operations:	6
- Bottom Bar:** A navigation bar with various icons (checklist, mail, person, shopping bag, etc.). It displays '\$194,981' and 'Milestone B' with a progress bar. On the right, it lists key metrics:

Visitors /m	2,598	Total Users	342
Signups /m	111	Revenue /m	\$15,840
Churn /m	73	Expenditure /m	\$45,957

The dashboard is divided into several sections:

- Backlog:** A list of tasks categorized by 'Feature', 'Test', 'Performance', and 'Security'. It includes various icons representing different task types and their counts.
- Product Metrics:** A central Kanban board with columns for 'To Do', 'In Progress', and 'Done'. Tasks are represented by blue cards with icons. A blue triangle highlights a specific task.
- Next Sprint:** A panel on the right showing team capacity and sprint planning. It includes a 'Team Capacity Per Sprint' table and a 'Next Sprint' header.
- Bottom Bar:** A navigation bar with icons for home, messages, users, shopping, search, analytics, and settings. It also displays a balance of \$194,981 and a 'Milestone B' indicator.

Dev:	20	Sales:	3
Design:	14	Operations:	6

Visitors /m:	2,598	Total Users:	342
Signups /m:	111	Revenue /m:	\$15,840
Churn /m:	73	Expenditure /m:	\$45,957

The dashboard is divided into several functional areas:

- Backlog:** A vertical panel on the left containing a grid of icons for various tasks and categories like Feature, Test, Performance, and Security.
- Product Metrics:** A central grid-based visualization showing a map of product features with colored cells (green, blue, brown) and various icons representing different metrics or states.
- Next Sprint:** A panel on the right showing team capacity and utilization. It includes a table for team capacity and a status message.
- Bottom Status Bar:** A horizontal bar at the bottom containing a navigation menu, a financial overview (\$194,981), a progress indicator for Milestone B, and a table of key performance indicators.

Dev:	20	Sales:	3
Design:	14	Operations:	6

*The Design staff are unutilized*

Visitors /m	2,598	Total Users	342
Signups /m	111	Revenue /m	\$15,840
Churn /m	73	Expenditure /m	\$45,957
